

CALL FOR PRESENTATIONS

12th Annual High Performance Sustainable School Buildings Workshop

Showcasing Affordable Sustainable Schools

March 10—11, 2015, Versailles, KY

Deadline: October 15, 2014

The Kentucky NEED Project and the Kentucky Department for Energy Development and Independence are seeking proposals for the 12th annual High Performance Sustainable School Buildings Workshop.

They seek dynamic presentations that inform school administrators, architects and engineers about proven practices, push the leading edge of the profession, and motivate the pursuit of high performance sustainable school design and renovation.

Session Topics: The committee will look for presentations that demonstrate *proven results of the high performance process* in Kentucky schools and districts in areas such as these:

- ☐ **Examples** and case studies of affordable, sustainable school buildings
- ☐ **Best Practices** to help a district achieve a high performance sustainable school building
- ☐ **New technologies** supporting an energy efficient sustainable building
- ☐ **Professional standards** such as LEED, Green Ribbon Schools or Energy Star that may be used to document high performance and garner recognition for a school or district
- ☐ **Affordable costs** and how to achieve a sustainable building project
- ☐ **Gaining District support** for a high performance sustainable school design and/or renovation

Outcomes: Attendees should be:

1. Inspired to implement high performance processes in their next building project and/or in their existing buildings.
2. Confident in new techniques that elevate high performance in their building design, construction and operations.
3. Supportive of the ideal that high performance is a process that begins with design and continues over the life of the building.
4. Shown that their investment in the high performance process is of value.

Requirement: One complimentary workshop registration will be given to one presenter per session. All additional presenters with that session must register for the conference.

Deadline for submission: October 15, 2014

Submit applications via email to: The Kentucky NEED Project c/o pproctor@need.org

Questions: Please call Pam Proctor at 859-547-8008
